

700TSV 7" Touchscreen LCD Monitor with VGA & AV Inputs

Description

NOTE: This 7 inch VGA Touchscreen Monitor has been replaced by the 700TSH.

Xenarc Technologies Corp. was the first to market with the iconic 700 series industrial display video monitors in the competitive 7" VGA display market and the 700TSV was the first 7" LED LCD screen with **VGA Video input** and 7" Touchscreen HMI. And now we have further improved this popular 7 inch **industrial-grade display monitor** by incorporating the latest LED backlight technology and adding an ambient light sensor. In addition, Chip Monolithic Ceramic Capacitors are used in place of Electrolytic Capacitors throughout the 7 inch VGA display monitor to further improve the stability and durability especially in extreme temperature and harsh conditions.

This groundbreaking 7" VGA touch screen display monitor incorporates the innovation of our **VGA 7" models** along with a **5-wire resistive Touch-Screen panel**. Use the convenient touch screen as your input device, control your mouse cursor or the mini on screen keyboard that comes with your operating system. The 7" touch screen utilizes the USB port as the interface. You can connect several 700TSV displays to your computer and the touchscreens would work simultaneously through the multi-monitor support. Our 7" small form factor, mini industrial-grade open frame, rack mount displays are designed for applications such as but not limited to:

- Transportation - Marine, Air, Heavy Vehicles, Mining, Weigh Stations, Fleet Management, Telematics, In-Car Computing, Public Transit, Cargo
- System Integration - Machinery Controls, Factory Automation, Environmental Monitoring, Home Automation, Military, Smart Home
